

Thank You Photo Card

Designed by Barbara Eastwick

Supplies Needed:

Templates:

Card Kreator (A2) <http://www.greensneakers.com/R47102>

Kreate-a-lope (A2) <http://www.greensneakers.com/R47102>

Patterned Papers:

Provo Craft, Scrap Pads, Little Princess

Textured cardstock (Aqua and yellow)

Other:

McGill Scalloped Circle Punch

JoAnn Craft Essential 'Thank You' Rub-On sheets

Adhesive

This two layered card is sturdy, and the lining allows the photo to sit framed inside the window.

Instructions:

1. Cut the patterned paper to the Card Kreator template size. Cut the Aqua colored textured card stock 1/16" shorter than the patterned paper. Using the template, mark the fold lines, and fold both papers on their middle line. On the patterned paper, using the scalloped circle, make your punch centered and near the top of the card. Save this scalloped circle of patterned paper for the inside. Line up the 'Many Thanks' phrase, and carefully rub the words on, checking to make sure they've adhered to the paper.
2. Cut a photo larger than the scalloped circle. Adhere photo into the window. Put adhesive on the inside of the patterned paper and the back of the photo. Carefully align the cardstock liner into the card and press to set the edges. It helps to line the edges up while the card is folded, and not pressed open. Adhere the scalloped circle cutout on the inside of the card. Rub on the words 'you're the best' to the circle. Your card is complete. I know the Grandma of this little birthday girl is going to be happy to receive such a thank you card!
3. To make the matching envelope, simply use another sheet of the same patterned paper, and follow the directions on the Kreate-a-lope template. Cut a 2 1/2 in x 3 3/4 in piece of yellow cardstock. Cut a 2 1/4 in x 3 1/2 in piece of remaining aqua cardstock and layer onto the envelope front for the address.
